

INSTALLATION MANUAL VIEWTECHAI CAMERA POWER INJECTOR

Part Number: VTAIPR

Product Description

This power injector allows a ViewtechAi Pedestrian Detection Camera to be powered without a monitor. This allows the camera to be used in standalone situations where the Ai features of the camera can be used to trigger alarms without need of a monitor.

Installation Instructions

1. Connect the red and black wires to your power source
2. Connect the male 4pin EzyConnect connector to the camera
3. Connect the female 4pin EzyConnect connector to a monitor or DVR if you still want to use video passthrough.

SPECIFICATIONS

Input Voltage	10V-32V
